## Uniform Crime Report

UCR crime statistics are used in many ways and serve many purposes. They provide law enforcement with data for use in budget formulation, planning, resource allocation, assessment of police operations, etc., to help address the crime problem at various levels.

The Safford Police Department is in the process of changing from UCR reporting to the NIBRS system of crime reporting. UCR reports only the most serious crime committed during an incident. NIBRS reports all crimes committed during an incident. When we convert to the NIBRS system our number of crimes will go up, but it is a more accurate reporting process. This will improve accuracy in statistics.

The table and chart shown below represents types of reported crime in the City of Safford, in both the nonviolent and violent categories.
